

Gowtham Oleti

Product Designer

Bengaluru, India
gowthamoleti.com • [LinkedIn](#)

OVERVIEW

Product Designer with a deep focus on digital interface design and native iOS engineering. Specialized in high-craft consumer interfaces, liquid motion, and zero-friction interaction models. Leverages AI workflows to accelerate native prototyping, shader engineering, and rapid product shipping.

WORK EXPERIENCE

CRED — Product Designer Apr 2026 — Present

- Crafting end-to-end interface details and tactile micro-animations for high-trust consumer financial workflows.
- Collaborating across product and engineering teams to refine spatial layout systems and visual fidelity across mobile screens.

District by Zomato — Product Designer Jan 2025 — Apr 2026

- Selected as **1 of 18 candidates out of 18,000+ applicants** after pitching direct design solutions to founder Deepinder Goyal.
- Converted from Product Design Intern (Jan — Apr 2025) to Full-Time designer based on product impact and delivery.
- Pioneered AI prototyping frameworks and automated design workflows, accelerating product iteration velocity across core feature pods.
- Redesigned seat-selection ergonomics and ticket discovery flows, eliminating interaction friction to directly facilitate **75M+ ticket sales**.
- Architected scalable component libraries and motion guidelines, contributing to District winning Google Play's **Best App of 2025**.

Dilytics & Mouse N Cheese — Product Design Intern Prior Experience

- **Dilytics**: Designed end-to-end interface flows and a gamified loyalty program for **Slash**, a house service booking application.
- **Mouse N Cheese**: Crafted end-to-end digital product designs, visual identities, and interactive web interfaces for client projects.

PROJECTS & APPS

Brink — Podcast Player & News App Featured on 9to5Mac Feb 2026 — Present

- Solo designed and engineered an iOS podcast player featuring custom timestamped bookmarks, audio news discovery, and a low-friction Walking Mode.
- Pioneered a Liquid Glass visual design language using AI-assisted Metal shader programming and native SwiftUI code.

Clipt — Native iOS Clipboard History #1 Paid App in India (App Store) Jan 2026

- Designed and built a native iOS clipboard manager utilizing SwiftUI and SwiftData to solve multi-device copy-paste friction.
- Engineered a custom iOS keyboard extension for zero-tap clip insertion and seamless multi-device sync via iCloud, reaching **#1 Paid App in India**.

NotchShelf — MacBook Utility Belt #1 Paid App in India (Mac App Store) Jan 2026

- Solved macOS desktop file clutter by transforming the hardware notch into a gesture-driven utility shelf featuring Quick Shelf file staging, Screenshot Magnet, and Quick Mirror.
- Built natively in SwiftUI as a debut macOS utility, hitting **#1 Paid App in India** on the Mac App Store.

Habee & OG Walls — Mobile Applications 2025 — 2026

- **Habee**: Minimalist SwiftUI habit tracker focused on routine consistency, frictionless entry, and micro-interaction detail.
- **OG Walls**: Android wallpaper application publishing personal fine-art photography portfolio directly to users via Google Play.

EDUCATION

Lovely Professional University — B.Design in Product Design 2021 — 2025

- Specialized in digital interaction design, human-computer interaction, and rapid software prototyping.

Sri Chaitanya Junior College — Higher Secondary (Class XI & XII) 2019 — 2021

Sanghamitra School — Primary & Secondary (Class I – X) 2009 — 2019

SKILLS & CAPABILITIES

Design	Interface Design, Motion & Micro-interactions, Design Systems, Spatial Layouts, Digital Ergonomics
Product	User Flows, Prototyping, Frictionless Checkout, AI Workflows & Tool Building, End-to-End Shipping
